## EVERYDAY RUSSIAN FOR SCHOOL STUDENTS

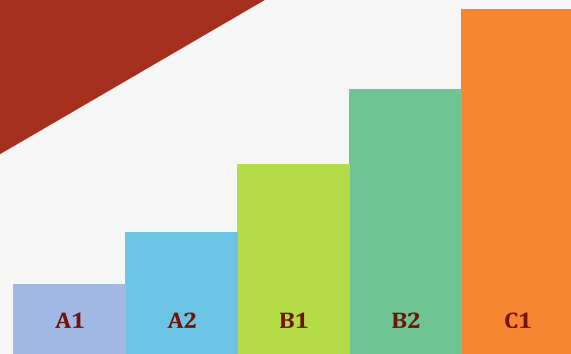

## Train your children for the future

The SPBU Language Testing Centre has developed the Russian as a foreign language test for school students. This test enables reference of the Russian language competence level in bilingual children and children, who study the Russian language, aged 4 – 16.

The test is relevant because it is compatible with school programmes that is why the young applicants can present their knowledge, ability, and skills and successfully pass it dealing with thrilling and comprehensible assignments.

The test is more than an exam. It provides the opportunity to award and motivate children in their language study. Obtained certificate can be beneficial in:

- preparing for the State Test of Russian as a foreign language for adults;
- assuring children in their skills;
- acquiring more friends.

## RFL Certificate for School Students

The test for school students is an innovative test with regard to the regional specific features of Russia.

Upon successful accomplishment of test assignments, an applicant is issued an SPBU Certificate, which confirms the reference level of Russian as a foreign language competence in compliance with the Common-European Framework of Reference (CEFR).

A1 – B2 level TORFL Certificates in Russian for everyday situations for school students are valid for 5 years, and C1 level Certificate has lifelong validity.

## Test formats

Each test consists of 5 sections developed to hold a comprehensive examination of the communication competence in school students, i.e. 'Reading', 'Vocabulary and Grammar', 'Writing', 'Phonetic comprehension', and 'Speaking'. They provide an evaluation of the communication skills in bilingual children of preschool age.

The five-level scale enables language acquisition in stage-by-stage mode and provides efficient learning. The test has been adopted to school students: the assignments contain topics and situations relevant to the age of youngsters and teenagers, thus, the test benefits not only for the methodological validity but also for the engagement of the applicants.
